

UC-M02 | Border Activity Monitoring (LAC / LoC)

Field	Detail
Domain	Military Activity Intelligence
Source Categories	CAT-D (Telegram OSINT: ElitePredatorss, frontier_force_2), CAT-A (RSS News)
Processing Mode	● Real-Time (0-30 minutes)
Business Value	● HIGH — National Security Intelligence + Procurement Signal

Keywords Triggered

- L1: Indian Army, PLA, Pakistan Army, LAC, LoC, Ladakh, Arunachal Pradesh, Galwan, Depsang, Siachen
- L2: Forward Deployment, Patrol, Bunker, Fortification, Airstrip, Road Construction
- L3: Border Incident, Transgression, Intrusion, Patrolling, Face-off, Stand-off, Disengagement, Buffer Zone, Ceasefire Violation, Infiltration, Cross-Border

JTBD: When a border incident or unusual military activity is reported near India's LAC or LoC, I want a real-time geo-tagged alert with cross-source verification status, so that I can assess threat level, identify procurement implications, and brief leadership with accurate, sourced intelligence within 30 minutes.

Intelligence Output

- Geo-tagged incident alert: Location | Type (patrol, construction, face-off) | Source count | Verification status | Threat level (Low/Medium/High/Critical)
- 72-hour border activity heatmap
- Cross-source validation: How many OSINT sources are reporting the same incident
- Historical pattern: Is this a new activity or continuation of a pattern?

Expected Result: Real-time border activity feed on dashboard map. Each incident appears as a geo-tagged pin with severity color (green/amber/red). Push alert when severity is Medium or above.

Analyst Actions Enabled

- Assess threat level and escalation risk within 30 minutes of incident
- Brief leadership with sourced, cross-verified intelligence
- Identify procurement implications: which systems are needed in that theatre

- Track escalation/de-escalation patterns over 30-day windows

Feeds Into: UC-G02 (Cross-Border Tension), UC-M06 (Escalation Monitor), UC-E04 (24-hr Forecast)

UC-M03 | Force Mobilization Detection

Field	Detail
Domain	Military Activity Intelligence
Source	CAT-D (Telegram: ClashReport, OSINTDefender, GlobalConflictMonitor),
Categories	CAT-A
Processing Mode	● Real-Time
Business Value	● HIGH — Early Warning Intelligence

Keywords Triggered

- L1: Indian Army, PLA, Pakistan Army, any armed force in region
- L2: Armoured Column, Mechanised Infantry, Artillery Deployment, Force Concentration
- L3: **Force Mobilization, Troop Concentration, Military Buildup, Forward Deployment, Redeployment, Military Movement, Column Spotted, Convoy, Armour Movement**

JTBD: *When unusual troop or armour movements are reported from OSINT sources near India's borders or in strategic regions, I want a validated, cross-sourced early warning alert, so that I can assess whether a planned military action is underway and provide leadership with a 24-72 hour escalation forecast.*

Intelligence Output

- Force movement alert: Type of force | Location | Direction of movement | Source count | Confidence level
- Escalation probability score: 0-100 for 24hr / 72hr windows
- Historical context: Is this normal deployment rotation or anomalous?

Expected Result: Dashboard alert with force type, location (map pin), confidence score, and escalation probability. Push notification on high-confidence detections.

Analyst Actions Enabled

- Trigger leadership brief on potential escalation scenario
- Assess diplomatic and military response options
- Identify emergency procurement implications for the affected theatre

Feeds Into: UC-M06 (Escalation Monitor), UC-E04 (Conflict Forecast), UC-G04 (Heatmap)

UC-M04 | Missile Test Detection & Tracking

Field	Detail
Domain	Military Activity Intelligence
Source Categories	CAT-A (RSS News), CAT-C (YouTube — DefenceMin, DRDO), CAT-D (Telegram)
Processing Mode	● Near-Real-Time
Business Value	● HIGH — Strategic Intelligence + R&D Signal

Keywords Triggered

- L1: DRDO, BDL, IAF, Indian Army, Indian Navy, ISRO, China, Pakistan, North Korea, USA, Russia
- L2: BrahMos, Akash, Astra, Pralay, Shaurya, Agni, QRSAM, Nirbhay, Hypersonic, SAM, ASAT
- L3: **Missile Test, Successful Test, Test Fired, Test Launch, Flight Test, User Trial, Test Range, ITR, Integrated Test Range, Chandipur, Abdul Kalam Island**

JTBD: *When India or any adversarial nation conducts a missile test, I want a structured intelligence brief on the missile type, range, payload, test outcome, and strategic implications, so that I can assess capability evolution and predict follow-on procurement for countermeasure or complementary systems.*

Intelligence Output

- Test intelligence card: Missile/weapon | Country | Test type | Range demonstrated | Outcome (success/failure) | Strategic significance
- Capability gap implication: Does this test expose a new threat requiring a countermeasure?

-
- Procurement signal: "This capability milestone typically triggers follow-on production contract in X months"

Expected Result: Test alert on dashboard within 1 hour of DRDO/MoD announcement or OSINT detection. Each test card links to historical test chronology for that system.

Analyst Actions Enabled

- Update threat capability database for adversary systems
- Identify countermeasure procurement opportunities (counter-drone, EW, missile defence)
- Track India's indigenous missile capability maturation — potential dual-use/export opportunities

Feeds Into: UC-M06 (Escalation Monitor), UC-P07 (Tech Gap), UC-T03 (EW Monitor)

UC-M05 | Naval Fleet Movement Tracking

Field	Detail
Domain	Military Activity Intelligence
Source Categories	CAT-D (Telegram: OSINTDefender, ClashReport, Liveuamap), CAT-A
Processing Mode	● Real-Time
Business Value	● MEDIUM-HIGH — Strategic Maritime Intelligence

Keywords Triggered

- L1: Indian Navy, PLA Navy, US Navy, Royal Navy, INS Vikrant, INS Vikramaditya, Aircraft Carrier
- L2: Carrier Strike Group, Destroyer, Frigate, Submarine, Maritime Domain Awareness, Naval Exercise
- L3: Fleet Deployment, Naval Deployment, Carrier Movement, Port Call, Maritime Exercise, Naval Standoff, FONOP, Freedom of Navigation, Strait Transit, Blockade

JTBD: When naval assets of India or adversary nations make significant movements — especially in the Indian Ocean Region or Indo-Pacific — I want a geo-tagged movement alert with strategic context, so that I can assess theatre dynamics and identify maritime security intelligence relevant to AILLA's naval customers.

Intelligence Output

- Fleet movement alert: Vessel type | Identity (if known) | Location | Direction | Context (exercise/deployment/patrol)
- IOR (Indian Ocean Region) maritime picture: 7-day fleet position summary
- Strategic assessment: Is this a FONOP, show of force, or routine deployment?

Expected Result: Live maritime activity feed showing significant fleet movements with geo-pins. Weekly IOR summary report for briefing purposes.

Analyst Actions Enabled

- Brief naval customers on maritime threat environment
- Identify maritime domain awareness (MDA) gaps — procurement opportunity
- Understand where Indian Navy is deploying — potential customer engagement zones

Feeds Into: UC-G01 (Indo-Pacific Dashboard), UC-N03 (Maritime Security), UC-E04 (Forecast)

DOMAIN 3: GEOPOLITICAL INTELLIGENCE

6 Use Cases — Strategic context, alliance dynamics, and regional power shifts.

UC-G01 | Indo-Pacific Intelligence Dashboard

Field	Detail
Domain	Geopolitical Intelligence
Source	CAT-A (RSS News — BBC, NYT, Indian Express), CAT-D (Telegram:
Categories	geo_gaganauts, SouthFrontEng)

Field	Detail
Processing Mode	 Batch-Daily
Business Value	 HIGH — Strategic Context for AIILA Export + Partnership Strategy

Keywords Triggered

- L1: Quad, AUKUS, ASEAN, US, Australia, Japan, South Korea, India, China, Taiwan
- L2: Any naval, space, or cyber capability
- L3: Indo-Pacific, FONOP, South China Sea, Taiwan Strait, Maritime Security, Regional Security, Strategic Competition, Alliances, Partnerships

JTBD: Every morning, I want a structured intelligence brief on overnight geopolitical developments in the Indo-Pacific region, so that I can understand the strategic context in

JTBD: *Every morning, I want a structured intelligence brief on overnight geopolitical developments in the Indo-Pacific region, so that I can understand the strategic context in which India's defence procurement is accelerating and identify export opportunities for AIIIA in partner nations.*

Intelligence Output

- Daily Indo-Pacific brief: 5-10 key developments ranked by strategic significance
- Alliance tracker: Quad, AUKUS, bilateral partnerships — new agreements, joint statements
- Export opportunity signals: Which partner nations are in procurement mode for what capability

Expected Result: Daily morning brief (automated, delivered by 7 AM) covering Indo-Pacific geopolitical developments with strategic significance scores.

Analyst Actions Enabled

- Brief CEO on strategic operating environment daily
- Identify export markets for AIIIA products based on partner nation procurement signals
- Track which nations are building defence capacity that AIIIA can supply

Feeds Into: UC-G02, UC-M05, UC-P08 (Partnership Discovery), UC-E01 (CEO Brief)

UC-G02 | Cross-Border Tension Monitor (India-China / India-Pakistan)

Field	Detail
Domain	Geopolitical Intelligence
Source Categories	CAT-D (Telegram: ElitePredatorss, frontier_force_2, ClashReport), CAT-A
Processing Mode	● Real-Time
Business Value	● CRITICAL — National Security + Emergency Procurement Signal

Keywords Triggered

- L1: India, China, Pakistan, PLA, Pakistan Army, Indian Army, LAC, LoC
- L2: Border, Forward Post, Patrol, Airspace, Fighter Scramble
- L3: Tension, Standoff, Incursion, Provocation, Diplomatic Protest, Military Alert, Red Line, Escalation, Deterrence, Nuclear Signal, Strike Warning

JTBD: *When tensions at India's borders escalate — through military incidents, diplomatic actions, or rhetoric shifts — I want a real-time tension index for both the India-China and India-Pakistan fronts, so that I can provide AIIILA leadership with a situational assessment and identify emergency procurement opportunities that arise from heightened threat perception.*

Intelligence Output

- Tension index per front (0–100): Updated every 30 minutes
- Event log: Each contributing incident with timestamp, source, and verification status
- 72-hour escalation forecast: Where is each tension trend heading?
- Emergency procurement flag: Which capabilities India would need most in an escalation scenario

Expected Result: Dual-front tension dashboard (China front / Pakistan front) with live indices, event logs, and escalation forecasts. Critical alerts push to leadership phones.

Analyst Actions Enabled

- Provide leadership with a calibrated, intelligence-backed assessment of threat level
- Identify which of AILLA's products are most relevant under current threat conditions
- Monitor for signals of de-escalation — which may create diplomatic procurement windows

Feeds Into: UC-M02 (Border Activity), UC-M03 (Force Mobilization), UC-E04 (Conflict Forecast)

UC-G03 | QUAD / SCO / BRICS Alliance Monitoring

Field	Detail
Domain	Geopolitical Intelligence
Source Categories	CAT-A (RSS News), CAT-C (YouTube — DD News, ANI)
Processing Mode	● Batch-Daily
Business Value	● HIGH — Export + Partnership Signal

Keywords Triggered

- L1: Quad, SCO, BRICS, ASEAN, US, Australia, Japan, India, Russia, China, Brazil, South Africa
- L2: Defence Cooperation, Military Exercise, Intelligence Sharing, Technology Transfer
- L3: **Summit, Joint Statement, Agreement, Bilateral, Trilateral, Alliance, Partnership, Defence Deal, MoU, Strategic Partnership, Sanction, Expulsion, Diplomatic Crisis**

JTBD: *When multilateral alliances hold summits or sign agreements that affect India's defence posture or export policies, I want a structured intelligence brief on outcomes, implications, and the defence-trade signals embedded in the communiqué, so that I can identify new export or partnership opportunities for AILA.*

Intelligence Output

- Summit intelligence brief: Key decisions | Defence trade implications | New agreements | Changed postures
- AIIA opportunity flags: New partnerships opening defence trade corridors that AIIA can enter
- Sanctions tracker: Which nations are sanctioned → implications for AIIA's customer list

Expected Result: Post-summit intelligence report within 24 hours. Standing weekly alliance tracker with activity status per bloc.

Analyst Actions Enabled

- Identify new export markets opened by diplomatic agreements
- Track which nations India is deepening defence partnerships with — AIIA follows
- Understand sanctions implications for AIIA's technology exports

Feeds Into: UC-G01 (Indo-Pacific Dashboard), UC-I01 (Startup Funding), UC-P08 (Partnership Discovery)

UC-G04 | Global Escalation Heatmap

Field	Detail
Domain	Geopolitical Intelligence
Source Categories	CAT-D (All conflict channels: ClashReport, Liveuamap, GlobalConflictMonitor, WarMonitors)
Processing Mode	 Real-Time
Business Value	 HIGH — Strategic Risk + Emergency Supply Chain

Keywords Triggered

- All L3 threat and escalation signals globally
- L1: Any armed force, nation, or armed group
- L2: Any weapon, vehicle, or capability in active use

***JTBD:** At any point in the day, I want a live global heatmap showing all active conflict zones ranked by current escalation level, so that I can assess global strategic risk, identify emergency procurement markets, and brief AILLA leadership on macro threat environments.*

Intelligence Output

- Global heatmap: Conflict zones color-coded by escalation level (Green → Red)
- Escalation index per theatre: Updated every 30 minutes
- Most escalated conflicts: Top 5 ranked by event frequency and severity
- India exposure analysis: Which conflicts threaten India's strategic interests or supply chains

Expected Result: Live visual heatmap on dashboard. Auto-refreshes every 30 minutes. Summary panel showing top 5 hotspots with current escalation index and 24-hour trend.

Analyst Actions Enabled

- Assess which conflicts may impact India's security environment
- Identify emergency export opportunities for defence equipment in conflict zones
- Track conflicts that drive demand for systems AILLA produces

Feeds Into: UC-M06 (Escalation Monitor), UC-E04 (Conflict Forecast), UC-E05 (Risk Dashboard)

DOMAIN 7: NATIONAL SECURITY & CYBER INTELLIGENCE

6 Use Cases — Threat monitoring with direct AILLA product relevance.

UC-N01 | CERT-In Cyber Threat Advisory Monitor

Field	Detail
Domain	National Security & Cyber Intelligence
Source Categories	CAT-B (CERT-In official feed), CAT-B (CISA — US)
Processing Mode	● Real-Time (As-published)
Business Value	● CRITICAL — Cybersecurity + Product Compliance

Keywords Triggered

- L1: CERT-In, CISA, NCIIPC, MoD, Critical Infrastructure operators
- L2: Malware, Ransomware, Vulnerability, CVE, APT, Zero Day, Phishing, SCADA, ICS
- L3: **Advisory, Alert, Vulnerability, Critical Vulnerability, Patch, Exploit, Attack Campaign, Cyber Incident, Data Breach, Ransomware Attack, Infrastructure Attack**

JTBD: *When CERT-In or CISA publishes a new advisory or vulnerability alert, I want an immediate structured brief covering the affected systems, threat actor, attack vector, and recommended mitigation, so that AIIILA's own systems are protected, and I can brief our defence customers on relevant threats to their infrastructure.*

Intelligence Output

- Advisory alert: CVE ID | Severity (CVSS score) | Affected systems | Attack vector | Mitigation steps | Active exploitation status
- AIIILA internal impact check: Does this vulnerability affect AIIILA's product stack?
- Customer advisory: Brief for AIIILA's defence customers on relevant threats

Expected Result: Real-time advisory alerts on dashboard. Critical (CVSS 9.0+) advisories trigger immediate push notification to AIIILA's security team.

Analyst Actions Enabled

- Patch AIIILA's own systems immediately on critical advisories
- Generate customer advisories for AIIILA's defence clients
- Track APT groups targeting Indian defence infrastructure — AIIILA's primary customers

Feeds Into: UC-N05 (Critical Infrastructure), UC-N06 (Threat Actor Mapping), UC-E05 (Risk Dashboard)

UC-N02 | Terror Threat Monitoring

Field	Detail
Domain	National Security & Cyber Intelligence
Source Categories	CAT-D (Telegram: thirdeyeosintandanalysis, ElitePredatorss), CAT-A (RSS News)

Field	Detail
Processing Mode	● Real-Time
Business Value	● HIGH — National Security + AILLA Customer Context

Keywords Triggered

- L1: Jaish-e-Mohammed, Lashkar-e-Taiba, Al-Qaeda, ISIS, TTP, Haqqani, ULFA, Naxal, Maoist
- L2: IED, Suicide Attack, Urban Warfare, Hostage, Improvised Device, VBIED
- L3: **Terror Attack, Terrorist, Militant, Extremist, Attack, Blast, Explosion, Bomb, Infiltration, Module Busted, Arrested, Encounter, Fidayeen, Fidayeen Attack**

JTBD: *When a terror attack, militant encounter, or extremist activity is reported in India or the region, I want a real-time intelligence brief with location, threat actor, method, and security response, so that AIIA can assess security implications and identify counter-terrorism procurement signals.*

Intelligence Output

- Terror incident alert: Location | Group | Method | Casualties | Response forces deployed
- Regional threat pattern: Is this incident isolated or part of a pattern?
- Procurement signal: Which counter-terrorism capabilities are needed in this theatre

Expected Result: Real-time terror incident alerts. Monthly South Asia terrorism threat assessment for AIIA customers.

Analyst Actions Enabled

- Provide context for AIIA customer threat assessments
- Identify counter-terrorism procurement signals (surveillance, C2, drones, EW)
- Brief AIIA's security team on threat actors that may target defence sector infrastructure

Feeds Into: UC-N04 (Strategic Warning), UC-G02 (Cross-Border Tension), UC-E05 (Risk Dashboard)

UC-N04 | Strategic Warning System

Field	Detail
Domain	National Security & Cyber Intelligence
Source Categories	CAT-D (All threat channels), CAT-A (RSS News), CAT-B (PIB, NDMA)
Processing Mode	● Real-Time + ● Near-Real-Time synthesis
Business Value	● CRITICAL — Multi-Domain Early Warning

Keywords Triggered

- Cross-cutting: All L3 threat signals across all domains simultaneously

JTBD: *Continuously, I want a composite strategic warning index that aggregates signals across military, cyber, terrorism, border, and geopolitical domains, so that I can detect the convergence of multiple low-level threats into a high-level strategic warning before it becomes a crisis — giving AILLA leadership and customers 24-48 hours of lead time.*

Intelligence Output

- Strategic Warning Index (0-100) updated every hour
- Domain breakdown: Military | Cyber | Terror | Border | Geopolitical — each with sub-index
- Warning trigger log: What specific events drove each index movement

Intelligence Output

- Strategic Warning Index (0-100) updated every hour
- Domain breakdown: Military | Cyber | Terror | Border | Geopolitical — each with sub-index
- Warning trigger log: What specific events drove each index movement
- 24-hour / 48-hour trajectory forecast

Expected Result: Live strategic warning dashboard. Critical threshold (index > 75) triggers executive push alert. Daily warning summary in CEO Brief (UC-E01).

Analyst Actions Enabled

- Provide early warning to AILLA leadership and customers
 - Identify when multiple threat vectors are converging — highest-value intelligence moment
 - Trigger pre-planned escalation response protocols
-

UC-V01 | Parliamentary Defence Debate Monitor

Field	Detail
Domain	Government & Policy Intelligence
Source Categories	CAT-C (YouTube: Lok Sabha TV, Rajya Sabha TV) — requires audio transcription pipeline
Processing Mode	 Batch-Daily
Business Value	 CRITICAL — Policy + Procurement Intent Intelligence

Keywords Triggered

- L1: Defence Minister, MoS Defence, MP, Parliamentary Standing Committee, PAC, DRDO Chairman
- L2: Any capability domain raised in Parliament

- L3: Parliament, Lok Sabha, Rajya Sabha, Question Hour, Starred Question, Budget Session, Zero Hour, Committee Report, Recommendation, Policy Direction, Government Response

JTBD: *When Ministers or MPs raise defence-related questions or debates in Parliament, I want audio-transcribed intelligence from Lok Sabha TV and Rajya Sabha TV capturing the exact statements made, capability gaps acknowledged, and policy commitments given, so that AILLA can extract procurement intent signals from the highest-authority source and respond faster than any competitor.*

Intelligence Output

- Parliamentary defence statement database: Date | Speaker | Constituency | Statement | Implied commitment | Capability referenced
- Acknowledged gaps from ministerial responses: Official confirmation of what is lacking
- Policy direction signals: Which domains are the government most focused on

Expected Result: Daily parliamentary intelligence digest covering defence-related exchanges. Alert when a Minister's statement contains a specific capability acknowledgment or procurement commitment in AILLA's domains.

Analyst Actions Enabled

- Quote exact ministerial statements in AILLA proposals and white papers
- Identify the MPs and their constituencies that are most actively pushing defence procurement
- Prioritize bid efforts based on which domains have official parliamentary acknowledgment of need

Feeds Into: UC-P02 (Tender Prediction), UC-P07 (Tech Gap), UC-V02 (PIB Intelligence)

UC-V02 | PIB Defence Release Intelligence

Field	Detail
Domain	Government & Policy Intelligence
Source Categories	CAT-B (PIB Defence Releases RSS)
Processing Mode	 Near-Real-Time
Business Value	 CRITICAL — Primary Source, Highest Authority

Keywords Triggered

- L1: MoD, DefenceMin, Indian Army, IAF, Indian Navy, DRDO, CDS
- L2: Any defence capability, system, or program
- L3: **Press Release, Announcement, Approval, Induction, Contract, MoU, Signed, Cleared, Sanctioned, Approved, Government of India, Government Decision, Cabinet Approval**

JTBD: *When the Press Information Bureau publishes any defence-related release, I want a near-real-time structured summary with intelligence extraction — identifying procurement signals, capability announcements, and policy decisions buried in government language — so that AILLA is among the first to act on official government intelligence.*

Intelligence Output

- PIB release alert: Title | Content summary | Intelligence tags (procurement / capability / policy / exercise / induction)
- Signal extraction: Explicit procurement signals extracted from official language
- Historical cross-reference: How does this release relate to past PIB releases on the same topic?

Expected Result: Near-real-time PIB intelligence feed. Each release card shows original summary plus extracted intelligence tags and signals. AILLA-relevant releases are highlighted.

Analyst Actions Enabled

- Build a database of all official government statements on defence — primary source for proposals
- Detect procurement signals faster than competitors who read newspapers 2 hours later
- Cross-reference PIB releases with CAT-A news to detect what media is missing

Feeds Into: UC-P01 (RFP Alert), UC-P03 (Contract Award), UC-V01 (Parliamentary Monitor)

UC-V03 | Defence Policy Impact Assessment

Field	Detail
Domain	Government & Policy Intelligence

Field	Detail
Source Categories	CAT-A (RSS News), CAT-B (PIB)
Processing Mode	 Batch-Weekly
Business Value	 HIGH — Strategic Context for AILLA

Keywords Triggered

- L1: MoD, Government of India, Cabinet Committee on Security, CCS, NSA, PMO
- L2: Any policy or regulatory area
- L3: Policy, DPP, Defence Acquisition Procedure, DAP, Defence Procurement Policy, DPIIT, Industrial Licensing, Export Licence, SCOMET, Security Clearance, Negative List, Positive List, FDI Policy, Offset Policy

JTBD: *When significant defence policy changes are announced — DPP amendments, offset policy changes, FDI limits, or new industrial licensing rules — I want a structured impact assessment on AIIA's business model, so that I can adapt our bid strategy, partnership structure, and product strategy to comply with and benefit from new policy.*

Intelligence Output

- Policy change alert: Policy | Change | Effective date | Impact on AIIA (positive/negative)
- Opportunity analysis: Does this policy change create a new market for AIIA?
- Compliance requirement: What does AIIA need to do to remain compliant?

Expected Result: Policy change alerts within 24 hours of announcement. Quarterly defence policy landscape report.

Analyst Actions Enabled

- Adapt AIIA's bid structures to new policy requirements immediately
- Identify policy-driven market opportunities (e.g., indigenization mandates)
- Brief AIIA's legal and compliance team on new regulatory requirements

Feeds Into: UC-P06 (Make in India Tracker), UC-G06 (Sanctions Monitor), UC-E05 (Risk Dashboard)

UC-D01 | Cyclone / Severe Weather Alert Monitor

Field	Detail
Domain	Disaster & Emergency Intelligence

Field	Detail
Source Categories	CAT-B (IMD CAP Alerts, NDMA RSS, MOSDAC Satellite Data)
Processing Mode	● Real-Time (3-hourly IMD updates → continuous monitoring)
Business Value	● HIGH — AILLA GIS Disaster Management Product

Keywords Triggered

- L1: IMD, NDMA, NDRF, State Disaster Management Authority
- L2: Cyclone, Tropical Storm, Depression, Monsoon, Rainfall, Flooding, Storm Surge
- L3: **Cyclone Warning, Red Alert, Orange Alert, Yellow Alert, High Alert, Evacuation, CAP Alert, IMD Bulletin, Severe Weather, Very Severe, Extremely Severe, Super Cyclone**

JTBD: *When IMD issues a cyclone or severe weather warning, I want a structured alert combining the official CAP bulletin with satellite data from MOSDAC, so that AIIA's disaster management products can automatically ingest and visualize the threat on a real-time geospatial dashboard for our government and defence customers.*

Intelligence Output

- CAP alert: Hazard type | Severity | Certainty | Urgency | Geographic area | Onset | Expiry | Instructions
- Satellite visualization: MOSDAC cloud imagery + IMD track forecast overlaid on Bhuvan basemap
- Impact assessment: Which districts, defence installations, or ports are in the forecast path

Expected Result: Real-time severe weather alert on dashboard with map visualization. Push notification to AIIA's government customers when alert covers their area of responsibility.

Analyst Actions Enabled

- Activate AIIA's disaster management geospatial product for customer deployments
- Brief state and national disaster management authorities using AIIA's platform
- Demonstrate AIIA's real-time geospatial intelligence capability during actual events

Feeds Into: UC-D02 (Disaster Impact on Defence), UC-D03 (Geospatial Mapping), UC-E05 (Risk Dashboard)
